Aleksandr Levchenko

Senior Frontend Developer · React / TypeScript · AI-Assisted Engineering

Lisbon, Portugal · levkadev@gmail.com · Telegram @Leviik · LinkedIn · Upwork · alevkas.github.io

PROFILE

Senior frontend developer with 8 years of commercial experience (since 2018) and 5+ years in React and TypeScript. Since 2022 I build enterprise web products at Veeam Software. I focus on maintainable component architecture, state management, build performance and faster product delivery. I work daily with AI coding agents (Claude Code, Cursor, Codex) and build the engineering setup around them: agent skills, project rules, hooks, MCP integrations and automated browser QA.

EXPERIENCE

Senior Frontend Developer · Veeam Software Sep 2022 — Present

Remote, Lisbon · enterprise data protection software

- Frontend development of enterprise web products with React, TypeScript, MobX and TanStack Query.
- Proposed and drove the migration of a large monorepo from webpack to Vite, and moved tests to Vite-based tooling (Vitest), shortening build and feedback loops for the team.
- Regularly propose process and tooling improvements that speed up product delivery.

Lead Frontend Developer · Luxoft Dec 2021 — Sep 2022

Price Control, a product price management platform

- Set up the project structure from scratch and wrote the webpack configuration.
- Built reusable components for the team's shared React component library.
- Ran code reviews and drove refactoring of the TypeScript codebase.

TypeScript, React, Webpack, Git, Jira

Software Engineer · Intevo Apr 2021 — Dec 2021

Belgorod · Fabrica, registry and dashboards for a food manufacturer

- Frontend development of an internal registry and operations platform; restructured the project and customized Ant Design components.

JavaScript, React, Ant Design, PostgreSQL, Docker, Webpack

Frontend / Full-Stack Developer · Softrust Jul 2018 — Apr 2021

Belgorod · healthcare information systems

- **CallCenter:** app for registering doctor house calls and keeping a call log; integrated the KLADR address registry. JavaScript, jQuery, PHP.
- **Display:** doctors' schedules on electronic boards in hospitals; frontend and backend, updates, documentation. JavaScript, jQuery, C#, ASP.NET MVC, SQLite.
- **Directory** (register of medical institutions) and **Reports** (work calendar reports): frontend and backend development. C#, ASP.NET MVC, MSSQL.
- Helped other teams with frontend and DevOps tasks on TypeScript, Angular, Docker and Webpack projects.

SELECTED AI PROJECTS

AI Persona Voice Chatbot Project-based

- Bot takes a Twitter/X profile link, parses the tweets and learns the writing style, then chats in that persona; integrated ElevenLabs for full voice conversation.

Local RAG Assistant Python

- Retrieval-augmented generation pipeline with LangGraph and local LLMs via Ollama: ingestion, chunking, embeddings, vector search and grounded answers.

SKILLS & EDUCATION

Frontend: React, TypeScript, JavaScript, MobX, TanStack Query, HTML, CSS/SCSS, Ant Design

Tooling: Vite, Vitest, Webpack, monorepos, Git, Docker, Jira

AI engineering: Claude Code, Cursor, Codex, agent skills, CLAUDE.md / AGENTS.md rules, hooks, MCP servers, browser automation (CDP), LangGraph, Ollama, ElevenLabs

Backend: Node.js, Python, C#, ASP.NET MVC, PHP, SQL (PostgreSQL, MSSQL, SQLite)

Education: BSc in Applied Informatics, Belgorod State Technological University named after V.G. Shukhov, 2014–2018

Languages: Russian (native), English (conversational)
